Notice

Asbestos Hazard Emergency Response Act of 1986 (AHERA)

Scecina Memorial High School of the Archdiocese of Indianapolis has complied with the EPA School Rule (1982) and AHERA (1986). The management plan for meeting the requirements of AHERA is available upon request in the school office.

The 3 year required inspection of this school was completed on July 7, 2007 by an accredited inspector/planner. The asbestos-containing building materials identified, if left undisturbed, do not present an immediate danger to building occupants. The following response actions and preventive measures have been taken or are planned in accordance with the management plan.

- All response actions required in the 3-year review were completed by March 2008.

Furthermore, periodic surveillance of asbestos-containing building materials is completed every six months to ensure that the materials are undisturbed and in good condition.

The building will be inspected by an accredited inspector/planner every three years after the inspection that occurred in July 2007.

I hereby certify that I have made the notifications required under AHERA.

Don Glowinski
Director of Building and Grounds
